FUZZISTOR™

The Fuzzistor™ provides classic silicon transistor distortion with complete control over the *BLEND* of the clean and Fuzz sound, amount of *FUZZ* from subtle to crushing, *LEVEL* for gain matching, and *TILT EQ* that changes the harmonic structure of the Fuzz from booming to gnarly.

**Features:**

- Silicon transistor distortion
- Intuitive four knob control layout
- Gig-saver bypass (signal passes even if your battery dies)
- Powered by a nine-volt battery or optional universal power supply
- Heavy duty steel construction
- Three-year limited warranty
I. Functions

A. Top Panel:

**BLEND**: Controls the mix ratio between clean and distorted signals. When the knob is set to the 12:00 position, the two signals are mixed at a 50:50 ratio. When the BLEND knob is turned counterclockwise the mix ratio favors the clean signal. When this knob is turned clockwise the mix ratio is reversed and favors the distorted signal.

**LEVEL**: Controls the overall output level.

**TONE**: Controls the tone of the distorted signal.

**FUZZ**: Changes the character of the distorted signal. Turning the knob clockwise will intensify the distortion, enriching the harmonic content of the sound.

**ENGAGE**: Toggles between on and off. The blue LED indicates that the effect is on.

B. Side Panel:

**IN**: ¼” input

**DC IN**: This is a standard 2.1mm DC jack. The center terminal polarity is negative.

**OUT**: ¼” output
C. **Specifications:**

- Current consumption: 4.5mA
- Input impedance: 1MΩ (Effect On)
- Output impedance: 1 KΩ
- External DC Power: 9-10VDC, center terminal negative

II. **Sample Settings**

Please visit our website, www.aguilaramp.com, for sample settings.

III. **How to change the battery**

This operation can be done quickly and easily with a standard #2 Philips screw driver!

The battery is easily accessible by loosening the screw on the bottom of the unit. The battery compartment will slide forward and you will be able to see the padded area to insert the battery and attach the battery clips. Once the battery has been replaced, simply slide the compartment back in and tighten the screw.
IV. Warranty Information

The Fuzzistor™ is covered under limited warranty against defects in materials and workmanship for a period of 3 years. This warranty is non-transferable.

The warranty period starts from the date of purchase from an authorized Aguilar dealer. Please retain your sales receipt as it is necessary to obtain warranty service.

Before sending your unit to Aguilar for repair, you must receive a return authorization number from us. Please contact us via email (techsupport@aguilaramp.com). Do not send any products to us without first receiving a return authorization from Aguilar.

You are responsible for all shipping charges. You must ship the unit to us freight prepaid. We will return the unit to you freight collect. Aguilar Amplification LLC is not responsible for shipping damage, either to or from our service center. Claims must be filed with the carrier.

The only company in the USA authorized to perform work under this warranty is Aguilar Amplification LLC of New York, NY.

Warranty service outside the USA: Warranty Service may be different in your country. Please contact the Aguilar distributor in your country for terms and procedures.
